

## Press Release - 18.02.2011

### SYNERGY Expanded its activities to Georgia

SYNERGY Construction established the Georgia branch and started works at Akhaltsike for the SIEMENS HVDC technology to transmit eco-friendly electric power from Georgia to Turkey as part of the Black Sea Transmission Network Project, one of the most significant infrastructure projects in Georgia. SYNERGY will be the civil partner of SIEMENS responsible from construction works Phase I. The works have been commissioned on 15.02.2011.

We are proud to be a part of this important project which will contribute to development of Georgia and increase the integrity of country to western countries and market.

SIEMENS has won an order to install two turnkey HVDC (high-voltage direct current) back-to-back links in Georgia to connect the Georgian power supply network with the grid system in Turkey. As part of the Black Sea Transmission Network Project, one of the most significant infrastructure projects in Georgia, the two HVDC back-to-back links are each to transmit 350 MW of controlled electric power generated in various hydropower plants in Georgia to Turkey.

This new establishment in Georgia strengthens the SYNERGY reputation as an "International Contractor" SYNERGY is providing general contracting services with its offices in Romania, Turkey, Libya, Ukraine and Georgia.
