What is the Romania Green Building Council?

The Romania Green Building Council is a non-profit, non-political association encouraging the market, educational, and legislative conditions necessary to promote high performance construction that is both sustainable and profitable.

The organization follows the model of other successful Green Building Councils that have achieved significant results in promoting environmentally responsible construction in other countries such as the US (www.usgbc.org), Germany (www.dgnb.de), UK (www.ukgbc.org) and Holland (www.dgbc.nl). The RoGBC is accredited as a "Full Member Council" of the World Green Building Council (www.WorldGBC.org).

The RoGBC is an inclusive organization recognizing the importance of the involvement of a wide array of companies including: Real Estate Developers, Investors, Facilities Managers, Construction Manufacturers, Expertise and Technology providers, Professional Firms (Architects, Engineers, Consultants, Lawyers, Etc.), Financial Services, Academia and NGOs.

Benefits of Becoming a Member:

- Positioning of your organization as a leader for creating the next generation of high performance green buildings
- Listing on the RoGBC website with a hyperlink to member's website, directing those interested in building green to your organization
- Association with the premier organization in Romania that promotes green building through private sector methods in support of government initiatives
- Access to latest training and information in the green building area
- Opportunity to network with representatives of leading companies that deliver green building services, technologies and projects
- Connection with international green building experts through RoGBC's contacts with the other GBC's
- Receiving notice of upcoming RoGBC conferences/exhibitions/workshops, including special discounts for members
- Access to the RoGBC comprehensive blog with frequent updates on the work of the RoGBC and opportunities for getting involved
- Opportunity to attend, contribute to and propose trainings on specific sustainable construction issues
- Partnering with the RoGBC to encourage a favorable legislative environment and become an advisory body in this area for public authorities
- Making use of the Founding Member/Member/Associate Member Logo on company websites, adverts, and other marketing materials

Some of our current activities include:

- **Green building education and promotion**
 - Organization of events: workshop, conferences, cafes and exhibitions
 - Information dissemination and public awareness campaigns on the benefits of building green
 - Publication of articles through collaboration with relevant publications
 - Creation of information materials (leaflets, booklets) on benefits of green buildings and quick methods to build green to be disseminated
 - Collaboration with relevant publications, to create weekly/monthly sections on green building with news and articles from the region
 - Participation in relevant events with presentations and information dissemination materials
- **Support of pilot projects implementing state of the art green building technologies**
 - Support to organize a green renovation of a multifunctional day care center for pre-school children in Herastrau Park, part of the campaign “The Capital Grows Green”
 - Initiate a best in class green building in Romania
 - Initiate a “green mortgages” pilot project
- **Legislative Outreach and market transformation**
 - Facilitation of dialogue between the construction and related sectors and government, to create a regulatory framework that fosters the development of a sustainable built environment
 - Work with government, industry and all concerned to remove barriers to adoption of sustainable building products, technologies and practices through the implementation of real government and market incentives
 - Participate at public work-groups and public consultations on relevant public policy issues (Environmental Technologies Action Plan, sustainable construction workgroup)
 - Establish relations with relevant government agencies and decision makers
 - Define, draft and propose public policy recommendations
- **Green Building Certification**
 - Adopt, develop and implement national green building standard and certification system based on a collaboration with WGBC and national/international experts
- **Research and development**
- **Member services**
 - Facilitate members’ professional development and networking opportunities
 - Create and update a RoGBC blog to inform members on the latest industry developments and events
 - Providing access to networks, information and resources.
